

Introduction

- Connect your IP phone to a Bluetooth headset
- Connect your IP phone to a wireless network
- Use only one dongle for both functions (Bluetooth & Wi-Fi)

Assembling the USB Dongle

Insert the USB Dongle to the USB port on the IP phone.

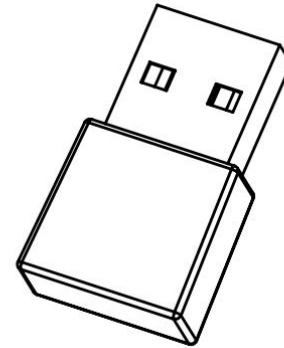

Connecting to the Wireless Network

- 1.Assemble the USB Dongle.
- 2.The LCD screen prompts "WIFI adapter plugged in. Start scan now?"
- 3.Press the **OK** soft key.
- 4.The phone saves and scans automatically.
- 5.Select **X Available Network(s)**.
- 6.Select the desired wireless network and then press the **Connect** soft key.
- 7.(Optional.) Enter its password in the Password field.
- 8.Press the **Connect** soft key.
- 9.Once the connection completes successfully, the icon ✓ appears after the SSID.

Connecting to the Bluetooth Headset

- 1.Turn on the Bluetooth headset.
 - 2.Long press the multifunction key on the Bluetooth headset until the indicator LED alternately flashes red and blue. The Bluetooth headset is in pairing mode.
 - 3.Assemble the USB Dongle.
 - 4.The LCD screen prompts "WIFI adapter plugged in. Start scan now?"
 - 5.Press the **Cancel** soft key.
 - 6.Find Menu then navigate as follows: Menu→Settings→Basic Setting→Bluetooth
 - 7.Turn on and press the **Save** soft key to save the configuration.
 - 8.Press the **Scan** soft key.
 - 9.The phone starts searching for Bluetooth headsets.
 - 10.Choose the desired Bluetooth Device from the list and press the **Connect** soft key.
 - 11.If the Bluetooth Device is connected/paired successfully, you will see the "Connect Success!" and successfully connected icon ✓.
